## Agricultural.

The Hay Crop. regard to the treatment of meadow lands. some any they have obtained the best results from top dressing with well rotted In winter or early in spring Another class do not believe in top dressing at all, but insist that all fertilizers of the above character can be used more economically upon lands by belog plowed under,-that as supu as the hay crop begins to fall the sod should be broken, thoroughly manured roots have been grown it should be again put down to grass. One thing is certain the average area of grass.

the average crop of grass cut upon our best farms is less than it should be. The average yield of bity cannot be put, taking one year with another, at more than one its content of the content ton to the sere. There are a few farms in the vicinity of the city of Bangor where tons to the care almost every year, but should not be justified in putting the bay crop over one ton to the here, and at this law floure all agree that it is not a onvice No futelligent fanuer expects land to hold our yleiding good crops year after year if nothing is returned to the soil We think the number of acres devoted to grass is greatly in excess of the amount of dressing made upon the farms. It would be much better to may less and devote nore space to the questure and the girlinfield. It is better to put twenty-five acres ! -into a condition to produce lifts tons acnually than to now over lifts agree to get the same amount. Many of our farmers are just compare the darrying and it is know how to keep a Theral minimal of stock on a Hunfred miniber of neces. This subject is worthy of circlal study. The [ from that the most enduring and intellal Mt. Desert Ferry generie applied to bethe most profitable. bounted. The object had in view in applystate in which it should be applied-whethresidently much mice good from of the when has their all and else using and lasting effort or for integer only soil and give a slow and lasting effect, or to act quickly upon the growing crop In 1 set ut

must give full play to his common sense cathor is not the best in amorbid to durithe is not the best in another located to sentential income to apply manness independent decor. Banger, April 11, 1885 they are applied to the soil they but in the and the titch silect things for the ous ways upon differently constituted soils, he must understand why them here ere in a certain state, is applied by to one soft while it produces no effect infinia dif-ferent soil. Decomposition of manure in ferent soil | Decomposition of the leaf also for set the seal good on very slow, yet if it is a laboratorist Abbreva wit and he ivy suit it is acted upon me-channally, as well as otherwise at having its particles separated, and thus benefited. whereas if a loose one, a disadratoryge re-sults historic trace amonds high, dry, sandy fand. The city can never be ex-fausted, and whi always give the soil the power of absorbing and retalling the clements of food for plants. When a soil does not contain naturally

any sulphate of lime, in when it has been exhausted by employs, the addition of that substante is of some abstance is of great value or two ways a st, by furnishing food for the placts, and 2d by fixing the immunita of the atmosphere and laying it in store for future use of plants by decomposing the cubonate of immunitation and the rain water, and making soluble, sulplate of amnoria, and at somite of time. It would be very discouraging it after all the pairs the farmer the takes to flet the soil with inquiries, I was llable to be all washed away or fato the hep earth by the mig, but, forting by it is not so, the water those not a recoil in these substances The best than to apply plaster is in they cars. start, in the morning while the degree or,
